NEWS RELEASE

**FOR IMMEDIATE RELEASE**

Nasdaq:POPEZ

July 26, 2006

**POPE RESOURCES REPORTS SECOND QUARTER NET INCOME OF \$3.5 MILLION**

Pope Resources (Nasdaq:POPEZ) reported net income of \$3.5 million, or 74 cents per diluted ownership unit, on revenues of \$15.6 million for the second quarter ended June 30, 2006. This compares to net income of \$4.1 million, or 86 cents per diluted ownership unit, on revenues of \$16.1 million for the comparable period in 2005.

Net income for the six months ended June 30, 2006 totaled \$8.8 million, or \$1.86 per diluted ownership unit, on revenues of \$31.7 million. Net income for the corresponding period in 2005 totaled \$8.7 million, or \$1.83 per diluted ownership unit, on revenues of \$32.8 million.

Earnings before interest, taxes, depreciation, depletion, and amortization (EBITDDA) for the quarter ended June 30, 2006 were \$6.0 million, compared to \$8.4 million for the second quarter of 2005. For the six months ended June 30, 2006, EBITDDA was \$14.9 million, compared to \$17.9 million for year-to-date 2005 results.

“Our second quarter 2006 results were lower based primarily on our planned reduction in harvest volume for 2006, as a result of which we experienced a 26% lower harvest volume compared to last year,” said David L. Nunes, President and CEO. “Notwithstanding the impact to earnings from this reduction in harvest volume, second quarter results were buoyed by a 5% increase in log prices over the same period last year, and by \$4.4 million of real estate sales which contributed \$0.6 million of operating income.”

For the first six months of 2006 log sales volumes for our Fee Timber segment decreased 15% compared to the same period in 2005, from 45 million board feet (MMBF) in 2005 to 39 MMBF in 2006. This decline is in line with our previously-announced reduction in annual harvest volume, from 74 MMBF in 2005 to 57 MMBF for 2006. Comparing the same six-month periods, average log prices were up \$28 per thousand board feet (MBF), or 5%, compared to last year. Year-to-date Fee Timber operating income increased slightly in 2006 inasmuch as the 2005 results included a heavier component of harvest from high depletion rate lands acquired in late-2004.

Our Timberland Management & Consulting segment posted year-to-date operating income of \$1.3 million in 2006 compared to \$1.7 million for the first six months of 2005. The decline in operating income from this segment is the result of fewer assets under management in 2006 offset only in part by earned property disposition fees.

Operating income for our Real Estate segment declined from \$0.8 million for the first six months of 2005 to \$0.2 million for the comparable period in 2006 due to higher cost basis in lands sold in 2006 versus 2005. Over the balance of 2006, we anticipate closings from both our Gig Harbor and Bremerton projects that will cause this segment's operating income to exceed 2005 levels.

### **About Pope Resources**

Pope Resources, a publicly traded limited partnership, and its subsidiaries Olympic Resource Management and Olympic Property Group, own or manage nearly 410,000 acres of timberland and development property in Washington and Oregon. In addition, we provide forestry consulting and timberland investment management services to third-party owners and managers of timberland in Washington, Oregon, and California. The company and its predecessor companies have owned and managed timberlands and development properties for more than 150 years. Additional information on the company can be found at [www.poperesources.com](http://www.poperesources.com). The contents of our website are not incorporated into this release or into our filings with the Securities and Exchange Commission.

This press release contains a number of projections and statements about our expected financial condition, operating results, business plans and objectives. These statements reflect management's estimates based on current goals and its expectations about future developments. Because these statements describe our goals, objectives, and anticipated performance, they are inherently uncertain, and some or all of these statements may not come to pass. Accordingly, they should not be interpreted as promises of future management actions or financial performance. Our future actions and actual performance will vary from current expectations and under various circumstances the results of these variations may be material and adverse. Some of the factors that may cause actual operating results and financial condition to fall short of expectations include factors that affect our ability to anticipate and respond adequately to fluctuations in the market prices for our products; factors that affect the amount, timing and certainty of our expected real estate sales; environmental and land use regulations that limit our ability to harvest timber and develop property; labor, equipment and transportation costs that affect our fee timber income; our ability to discover and to accurately estimate liabilities associated with our properties; and economic conditions that affect consumer demand for our products and the prices we

receive for them. Other factors are set forth in that part of our Annual Report on Form 10-K entitled "Risk Factors." Other issues that may have an adverse and material impact on our business, operating results, and financial condition include those risks and uncertainties discussed in our other filings with the Securities and Exchange Commission. Forward-looking statements in this release are made only as of the date shown above, and we cannot undertake to update these statements.

Management considers earnings (net income or loss) before interest expense, income taxes, depreciation, depletion and amortization (EBITDDA) to be an important measure of operating profitability, particularly when comparing results between different timber-owning companies because there are varying methods of calculating depletion expense under GAAP. With different issuers employing various calculation methodologies, disclosure of EBITDDA can make it easier for the reader to make meaningful comparisons between the operating results and cash-generating capabilities of different timber companies.
